Disposable 100% Cotton Linen

The disposable cotton linen products are made of a very stylish material and their visual impact is amazing.

The disposable linen material is 33% lighter than the rotable linen and apart from their visual impact, there is also a very important environmental impact that we would like to share with you.

More info in our web

Rotable High Temperature Casserole

We have developed a new material for plastic casseroles called Rotable High Temperature (RHT) that perfectly matches all OBS requirements.

This is a very stylish product that will improve your Economy class hot meal service.

Advertising Headrest Cover

Ecco

The advertising headrest cover has a transparent compartment in the back. This compartment makes it easy for advertisement to be changed, since ads can be slid in and out quickly.

These headrest covers are manufactured to specific customer requirements and can be made of leather or PVC.

Business Class Coat Hanger

Rotus

It is an elegant time saver whose practicality simplifies first and business class passenger boarding, efficiently reducing the chances of misplacing the passenger’s belongings.

Our business class hanger has two or three wheels built-in depending on how many business rows you need. All you need to do is turn its wheels to enter your passenger’s seat number before hanging up their jacket.

With this device there is no need for the crew to collect passengers’ boarding pass anymore.
